Introduction

eLab - Your New Electronics Store out of the box! Launch your website today with a few clicks. eLab is fully compatible with WooCommerce. ELab – Electronics Store WooCommerce Theme is tune with all devices, browsers and platforms, retina ready and comes with super-fast and user-friendly X Builder page builder plugin. No coding skill required to create or edit content.

Some of the features of the eLab – Electronics Store WooCommerce Theme include:

- GDPR Compliant - Your guests will find the checkbox for opt-in consent below each booking form to accept your website terms and conditions before reservation.
- Multilingual Support - Easily translate a website to any language.
- Responsive & Mobile Friendly - eLab is fully responsive and looks great on all devices.
- Built with SASS – the most stable and powerful professional grade CSS extension language
- X Builder – drag & drop page builder
- Compatible with Firefox, Safari, Chrome, and Edge
- Bootstrap-based Responsive Layouts
- Ability to have a Background image for your website
- Ability to use any of 800+ Google Fonts
- One-click demo content import
- Product Catalog with WooCommerce
- Ability to add products to a wishlist page
- Ability to compare products on the store
- Ability to add Revolution Slider to pages
- Retina Ready
- SEO ready
- Contact Form 7 – Ready
- MailChimp – Ready

System Requirements

To install the eLab Theme you must have a working version of WordPress already installed. For information regarding the installing of the WordPress platform, please see the WordPress Codex at http://codex.wordpress.org/Installing_WordPress.

Installing the Theme

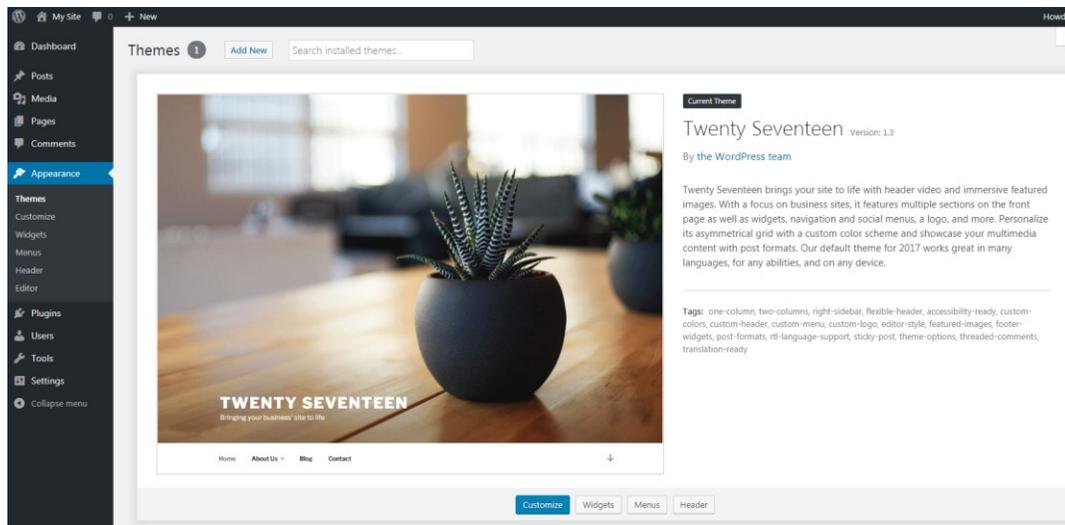

You can install the theme just as you would install any other WordPress Theme.

Note: In order to install a theme, you would need to login to your WordPress admin area with Administrator rights.

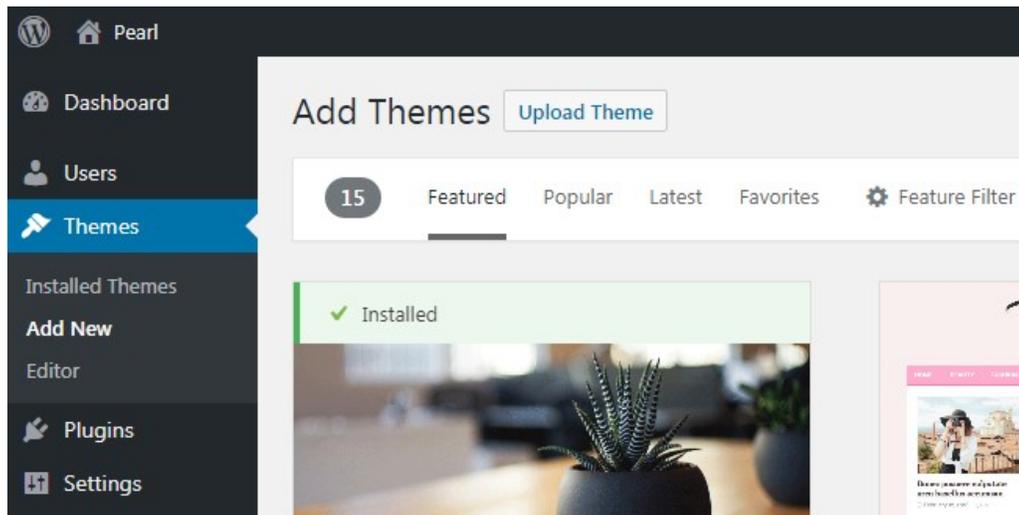

Tip: If you wish, you can view a video of the Installation process at – <https://www.youtube.com/watch?v=sZkW6nbUsKI>

To install the theme:

1. In the WordPress Dashboard, click on **Appearance > Themes** to open the Themes screen.

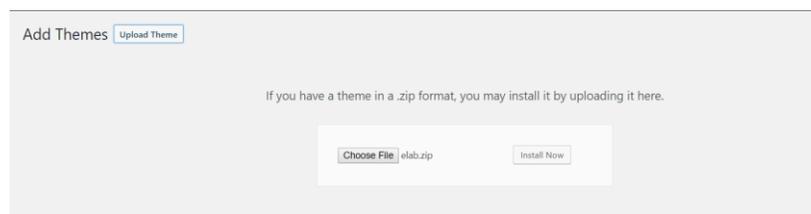

2. Click on the **Add New** button to open the Add Themes screen.

3. Click on the **Upload Theme** button and upload the zipped theme file you have received from ThemeForest - <https://help.market.envato.com/hc/en-us/articles/202821510-Theme-is-missing-the-style-css-stylesheet-error>.

Note: Depending on the speed of your Internet connection, it may take some time to upload the zip file.

4. Once the file is uploaded click on the **Install Now** button to install the theme.

Note: If you have trouble installing the theme, please see the next section: *What to do if the theme installation fails*.

What to do if the theme installation fails?

If the installation stalls and fails to respond after a few minutes, or if WordPress gives you an error message, you are suffering from PHP configuration limits that are set too low to complete the

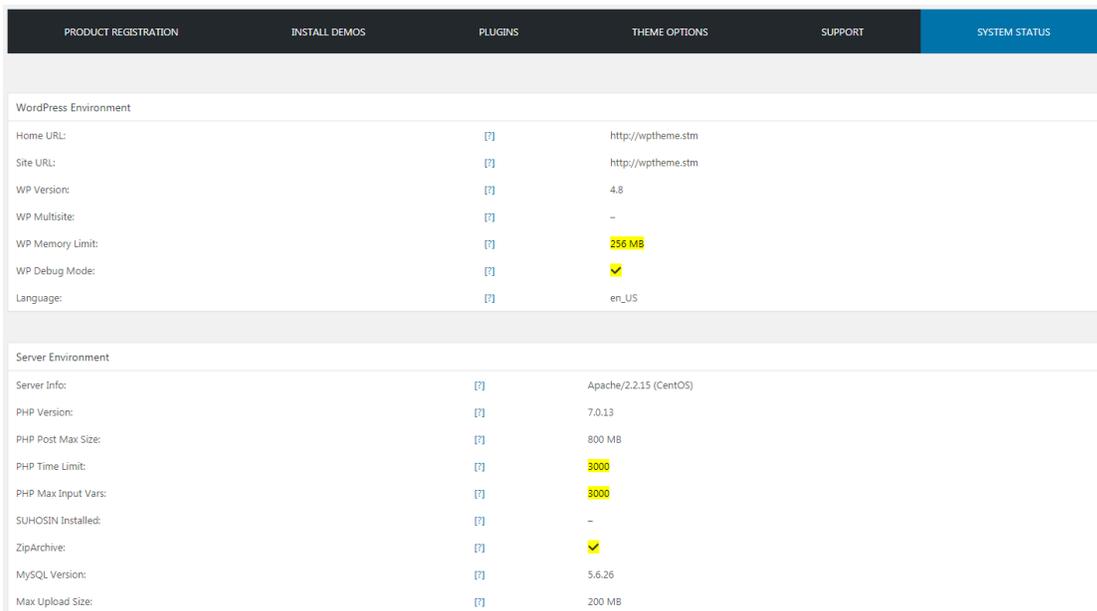

process. You should contact your hosting provider and ask them to increase those limits to a minimum as follows:

- `max_execution_time` 600
- `memory_limit` 256M
- `post_max_size` 32M
- `upload_max_filesize` 32M

You can verify your PHP configuration limits by installing a simple plugin found here: <https://wordpress.org/plugins/debug-info/>. You can also check your PHP error logs to see the exact error being returned.

Viewing System Status

You can also view some of your WordPress system settings by going to the eLab Theme System Status page. (Click on **Elab > System Status** in the WordPress menu.) This page will provide information about your WordPress environment and your server environment.

The screenshot shows the WordPress System Status page with a navigation bar at the top containing: PRODUCT REGISTRATION, INSTALL DEMOS, PLUGINS, THEME OPTIONS, SUPPORT, and SYSTEM STATUS (highlighted in blue). The page is divided into two main sections: WordPress Environment and Server Environment. In the WordPress Environment section, 'WP Memory Limit' is highlighted in yellow with the value '256 MB'. In the Server Environment section, 'PHP Time Limit' and 'PHP Max Input Vars' are highlighted in yellow with the values '3000' and '3000' respectively. A 'ZipArchive' status is marked with a yellow checkmark.

WordPress Environment		
Home URL:	[?]	http://wptheme.stm
Site URL:	[?]	http://wptheme.stm
WP Version:	[?]	4.8
WP Multisite:	[?]	-
WP Memory Limit:	[?]	256 MB
WP Debug Mode:	[?]	<input checked="" type="checkbox"/>
Language:	[?]	en_US

Server Environment		
Server Info:	[?]	Apache/2.2.15 (CentOS)
PHP Version:	[?]	7.0.13
PHP Post Max Size:	[?]	800 MB
PHP Time Limit:	[?]	3000
PHP Max Input Vars:	[?]	3000
SUHOSIN Installed:	[?]	-
ZipArchive:	[?]	<input checked="" type="checkbox"/>
MySQL Version:	[?]	5.6.26
Max Upload Size:	[?]	200 MB

Any items that require your attention will be highlighted in yellow.

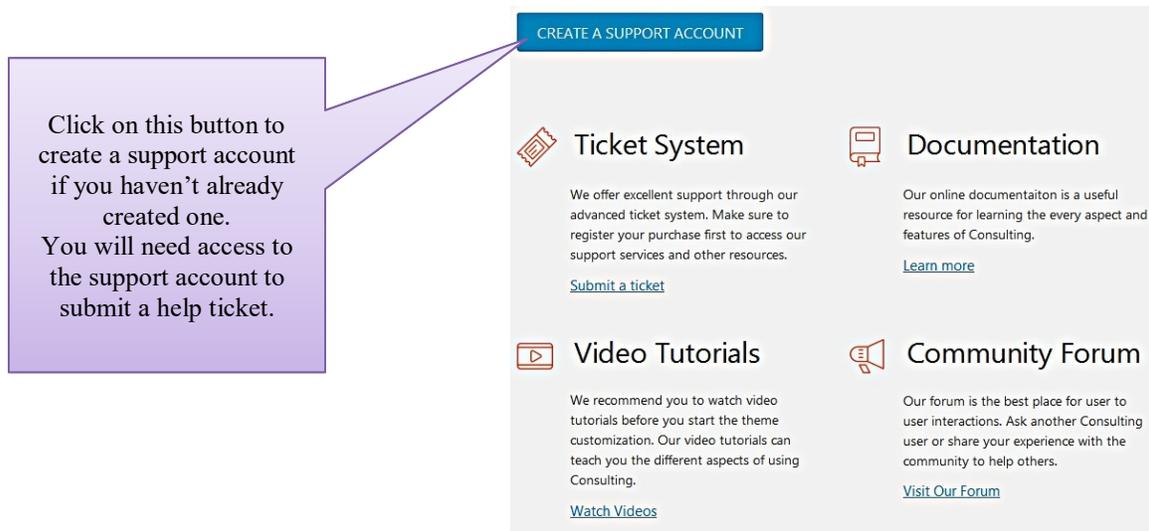

Getting Help

Your eLab Theme comes with six months of free support.

In case you are facing problems with using the eLab Theme, you can get help in the following ways:

- Read our online documentation.
- Watch online video tutorials to learn how to customize the theme.
- Visit our Community Forum.
- Submit a Help Ticket.

Click on **elab > Support** in the WordPress menu to access the Support page.

The screenshot shows a support page layout. At the top, there is a blue button labeled "CREATE A SUPPORT ACCOUNT". Below this, the page is divided into four sections: "Ticket System", "Documentation", "Video Tutorials", and "Community Forum". Each section contains a brief description and a link. A purple callout box points to the "CREATE A SUPPORT ACCOUNT" button with the following text:

Click on this button to create a support account if you haven't already created one. You will need access to the support account to submit a help ticket.

CREATE A SUPPORT ACCOUNT

Ticket System
We offer excellent support through our advanced ticket system. Make sure to register your purchase first to access our support services and other resources.
[Submit a ticket](#)

Documentation
Our online documentaiton is a useful resource for learning the every aspect and features of Consulting.
[Learn more](#)

Video Tutorials
We recommend you to watch video tutorials before you start the theme customization. Our video tutorials can teach you the different aspects of using Consulting.
[Watch Videos](#)

Community Forum
Our forum is the best place for user to user interactions. Ask another Consulting user or share your experience with the community to help others.
[Visit Our Forum](#)

Note: You can also get extended support through subscriptions via ThemeForest.

Theme Activation

Once the theme is installed, you need to activate the theme to enable the eLab Theme demos and theme auto update feature.

Click on **Activate** to activate the theme. You will then have to generate a token.

Steps for activating the theme:

- 1) Click on the **Generate a Personal Token** link. A new window will open that takes you to the Envato Account sign-in page.
- 2) **Sign in** using the credentials of the same account you used to purchase the Pearl theme.
- 3) **Enter a name** for the token. (This name is to identify this token anytime later.)
- 4) **Select the following checkboxes from the Permissions Needed section:**
 - * View Your Envato Account Username,
 - * Download Your Purchased Items,
 - * Verify Purchases You've Made, and
 - * List Purchases You've Made.
- 5) Select the checkbox to **agree** to the terms and conditions and then click on the **Create Token** button.
- 6) A new page will load with a token in a box. **Select the token text** and copy it to the clipboard by pressing **Ctrl+C** on your keyboard.

Token name

Pick something cool, short and catchy!

Permissions needed

- View and search Envato sites
- View your Envato Account username
- View your email address
- View your account profile details
- View your account financial history
- Download your purchased items
- View your items' sales history
- Verify purchases of your items
- List purchases you've made
- Verify purchases you've made
- View your purchases of the app creator's items
- View your public and private collections
- View your statement transactions
- View the total number of subscribed users to Envato Market
- Shows the total number of items available on Envato Market

I have read, understood and agree to the [Terms and Conditions](#).

Create Token

Paste the token in the provided box and click on the **Submit** button.

If activation is successful, you will see a green check mark.

You can follow [this manual](#) if activation fails.

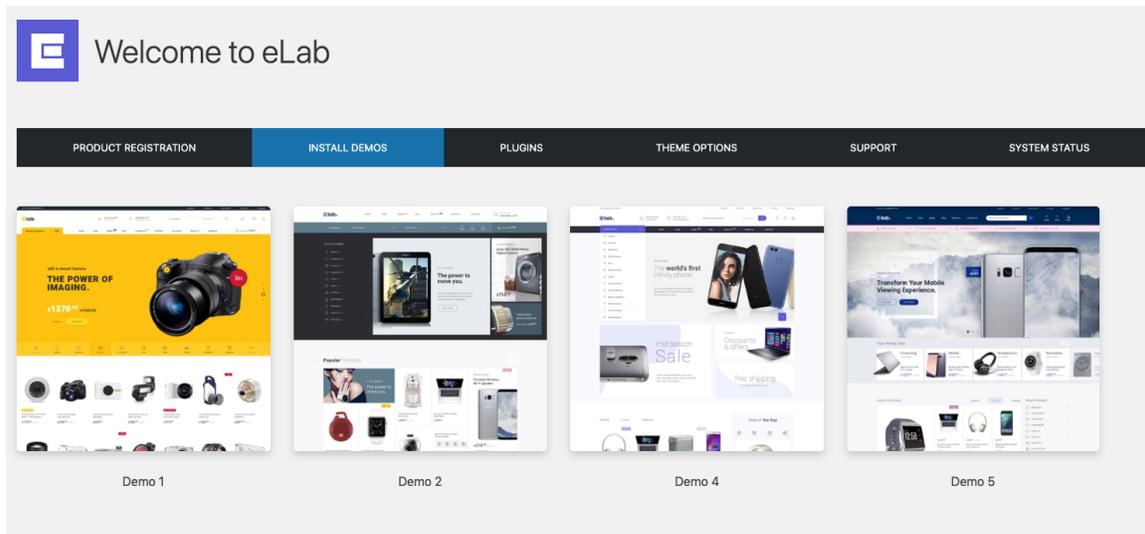

Demo Import

Once the theme is installed, you will find a new **eLab menu** in the WordPress dashboard. You can use this menu to access the different theme-related pages.

Don't know where to start on building up your site? We have created an option for you to recreate our theme demo site with just one click.

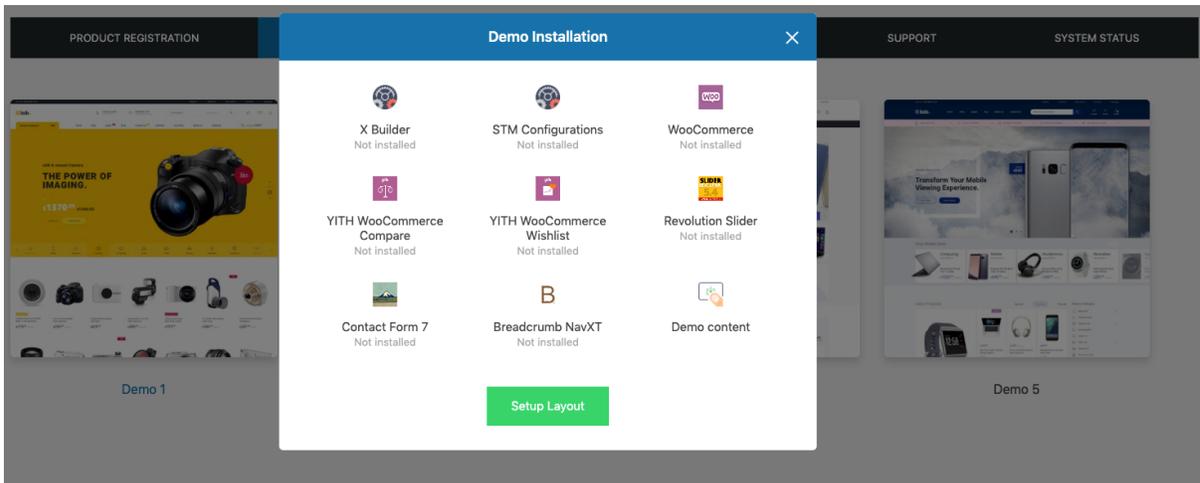

Tip: Before importing the demo content, you can check out the various demos at <https://elab.stylemixthemes.com/landing/>. You can see the different demos and decide on which one suits your firm the best.

Click on **eLab > Demo Import** in the WordPress menu.

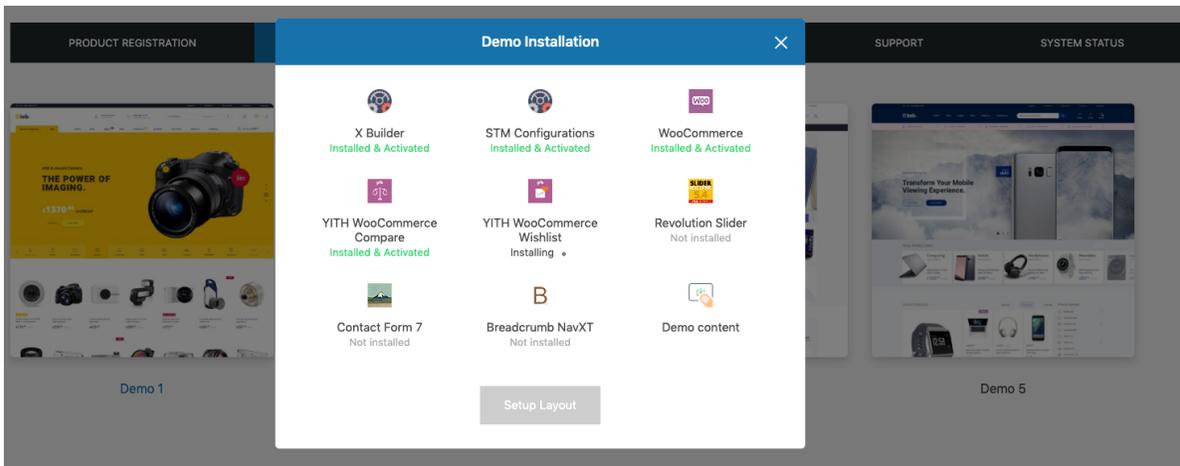

Tip: You can use the demo content as a starting point for your website and modify the content to suit your needs. In that case, select the demo layout that is most appropriate for your website.

Each demo layout requires a number of plugins to function properly. Fortunately, StyleMix Themes has made it easy for you to install the plugins and they will be installed automatically during demo setup proceed. In order to start the import proceed, click on the **Setup layout** button.

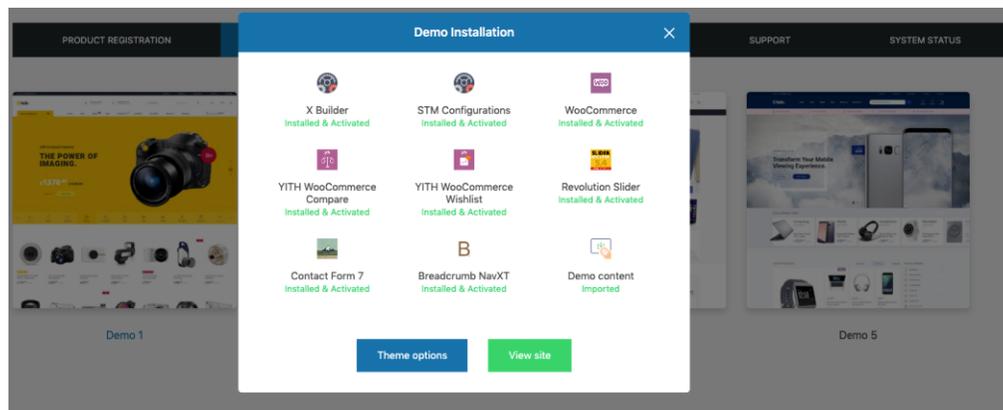

Note: Depending on the speed of your Internet connection, it may take some time to install all the plugins and import the demo content.

Note: If the import fails or stalls, please try to **reload the page** and click on **Setup layout** button once again or see the previous section: *What to do if the theme installation fails.*

Note: All the plugins which are not free come under our **EXTENDED License**, so you **don't need to pay for their license to use them**. Some of them might have messages requiring activation, but they are already activated on our side. No purchase code needed. When using them under our license you will need to wait for the plugin updates in our regular theme updates. **If you want to be able to auto update them from wp-admin, you will need to buy your own personal license for that.** However, we always include the latest versions of the plugins in every update of the theme.

Setup Layout feature installs all required plugins, imports the chosen demo layout and widgets. After finishing the proceed you can visit your site front page in order to see all ready features 😊

Tip: If you want to start from scratch after viewing the demo content, you can remove the demo content using the **Reset WP** plugin (<https://wordpress.org/plugins/reset-wp/>). This plugin resets the WordPress database back to its defaults. It will delete all customizations and content, but it does not modify files; it only resets the database. Please see the above link for more details.

Updating the theme

We will periodically provide updates of your theme. These updates are essential if you want to have a bug-free website as we give new features and improvements to the theme over time. Some of these updates might be needed in order to make the theme compatible with newer versions of WordPress.

Note: There is no risk of losing your settings and pages when you update the theme. However, any modifications you have made to the core theme files will be lost, so you should back up those files before you update the theme.

Tip: After upgrading the theme, you can update extra plugins via **eLab > Install Plugins**.

There are three ways of updating our WordPress themes to newer versions:

- Updating via the WordPress Admin Panel (using Dashboard > Updates)
- Update via the WordPress Admin Panel (using an extra plugin)
- Updating via FTP

Updating via the WordPress Admin Panel (using Dashboard > Updates)

The easiest way of updating the theme is via **Dashboard > Updates**. When an update is available for your theme, you will get a notification in your WordPress Dashboard and you can update your theme by clicking on **Dashboard > Updates** and updating the theme (just as you would update any other installed theme).

Note: You will need the **token key** you had generated when you had originally installed the theme. You will find this under the **Settings > API Keys** section of your profile on **Themeforest**.

Updating via the WordPress Admin Panel (using an Extra Plugin)

For this method you should first install the Easy Theme and Plugin Upgrades plugin (<http://wordpress.org/plugins/easy-theme-and-plugin-upgrades/>). This plugin will update your theme when you upload the theme.zip file.

Once you have installed the Easy Theme and Plugin Upgrades plugin:

1. Download the theme file update from ThemeForest.
2. Extract the **elab.zip** file from the downloaded theme file.
3. In the WordPress dashboard, click on **Appearance > Themes > Add New > Upload Theme > Browse...**
4. Select the **elab.zip** file that you extracted in step 2 and click on **Install Now**.

Updating via FTP

Another way of updating your theme is via FTP. Extract the contents of the **elab.zip** file (which you will find inside the theme update file you have downloaded from Themeforest). The contents will be extracted to a folder called **elab/** and to subfolders within the elab folder.

Tip: Make sure your unzipping software does not create any extra directory with the same name nested within the **elab/** folder.

Using an FTP program, upload the **elab/** folder (and its subfolders) to `/wp-content/themes/` on your web server.

Note: The FTP program will give a warning that the elab/ folder already exists. Choose **Replace All**.

Final Tip: Whichever method you use to update your theme, clear your browser cache after each update if you notice anything off. Old theme files can sometimes persist in your local cache and make you think something's wrong

Setting Up your Website

Once the eLab Theme is installed, you will now have to customize the theme to suit your needs. The following are some of the tasks you need to complete to customize the theme:

- Set up global settings such as max width of content, global sidebar and promo banner.
- Select header styles, set up header and footer content.
- Choose your own color scheme and typography options.
- Configure your shop page settings.
- Set up the archive pages of the website.
- Change the main language of the site (if your main language is not English).

The screenshot displays the 'Theme Options' panel with several sub-sections and settings:

- General:** Content Max Width (input field), Global Sidebar Name (Select Sidebar), Global Sidebar Position (Without Sidebar), Google Map API key (AlzaSyDRIOJcH5jISFqsAFGOgkGLZ), Show Promo Popup (toggle), and Promo Popup Title (Sign up for the Latest news, Trends).
- Header Style:** Five options (Header Style 1 to 5) with visual previews showing different header layouts.
- Socials:** Input fields for Facebook F, VK, Behance, Flickr, and LinkedIn.
- Shop:** Shop Banner (Select), Product Hover Style (Small box with icon buttons), Products View in Shop Page (Grid style 1), Shop Page Style (Default), Single Product Style (Image Left), and Products Per Page (16).

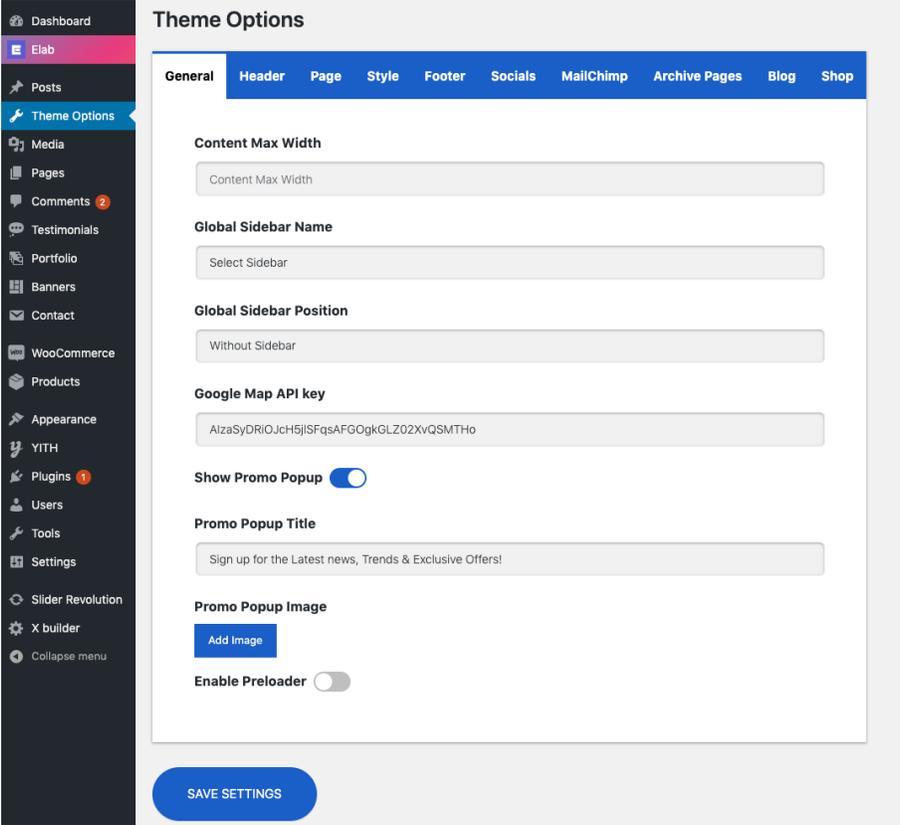

Customizing the Theme

You can perform general customization of the eLab Theme by going to **Dashboard > Theme Options** (just as you would normally do for any other theme). Here, you can set up the following:

- General site settings such as logo; default visualization options; Google API credentials, etc.
- Header and Footer for your pages.
- Colors scheme.
- Typography settings.
- Page and archive pages options.
- MailChimp API credentials.
- Shop layout options.

General Theme Options

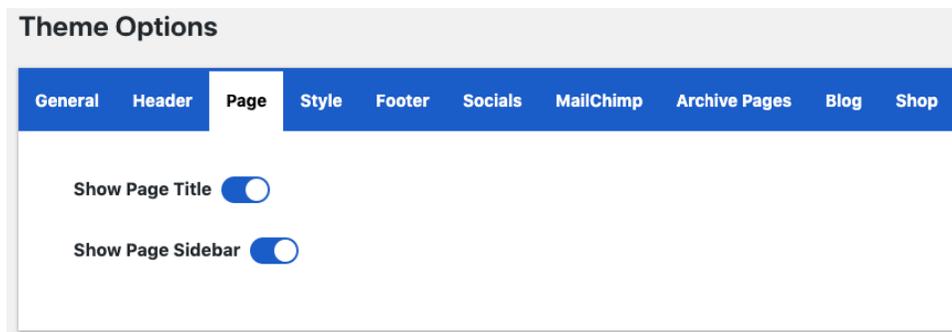

Here you can setup global website settings such as site content width, global sidebar and its position, Google Map API, Promo Popup banner and Preloader options.

The screenshot displays the 'Theme Options' dashboard for the eLab theme. The left sidebar contains a navigation menu with items like Dashboard, Elab, Posts, Theme Options, Media, Pages, Comments (2), Testimonials, Portfolio, Banners, Contact, WooCommerce, Products, Appearance, YITH, Plugins (1), Users, Tools, Settings, Slider Revolution, X builder, and Collapse menu. The main content area is titled 'Theme Options' and features a tabbed interface with tabs for General, Header, Page, Style, Footer, Socials, MailChimp, Archive Pages, Blog, and Shop. The 'General' tab is active, showing several settings: 'Content Max Width' with a text input field; 'Global Sidebar Name' with a dropdown menu; 'Global Sidebar Position' with a dropdown menu; 'Google Map API key' with a text input field containing 'AlzaSyDRIOJch5jISFqsAFGOgkGLZ02XvQSMTHo'; 'Show Promo Popup' with a toggle switch turned on; 'Promo Popup Title' with a text input field containing 'Sign up for the Latest news, Trends & Exclusive Offers!'; 'Promo Popup Image' with an 'Add Image' button; and 'Enable Preloader' with a toggle switch turned off. A 'SAVE SETTINGS' button is located at the bottom of the main content area.

Global Page Settings

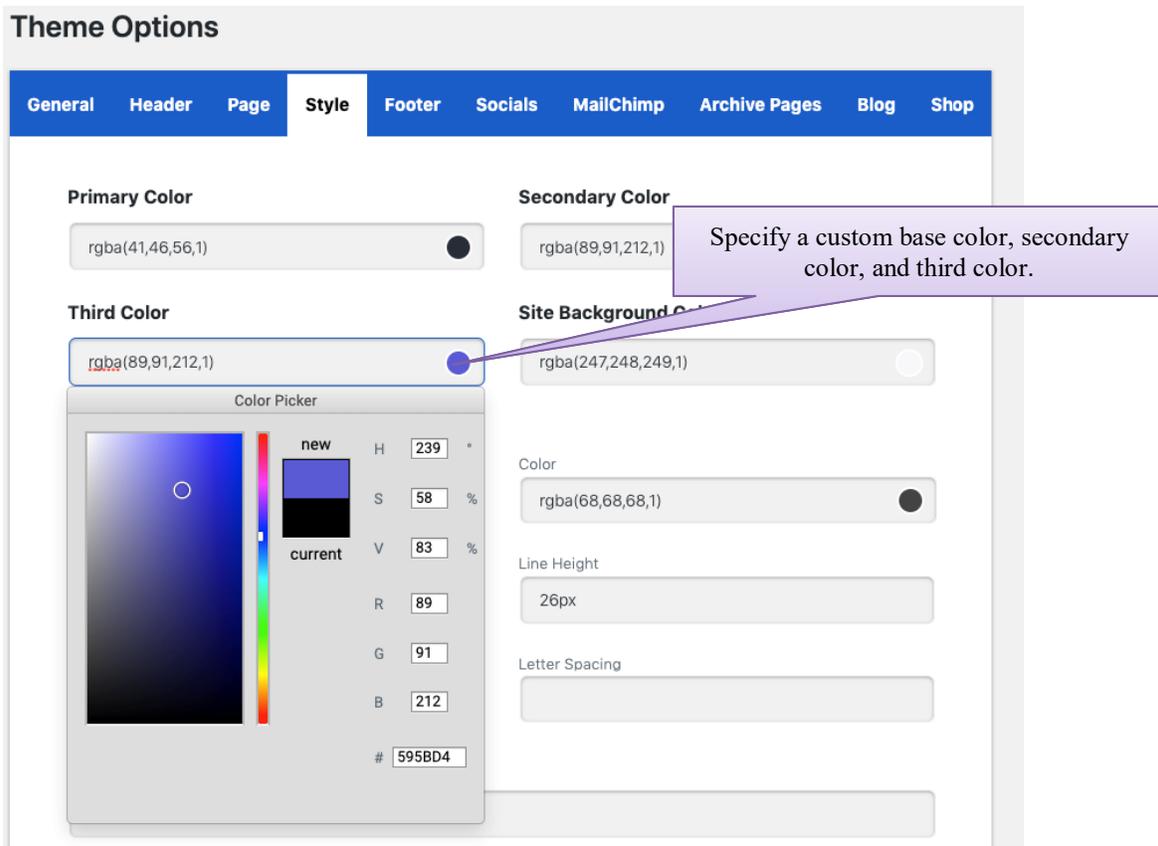

You don't need to edit every single page and disable title or sidebar manually. You can go to the **Dashboard > Theme Options > Page** section and enable/disable the title and sidebar of your pages globally.

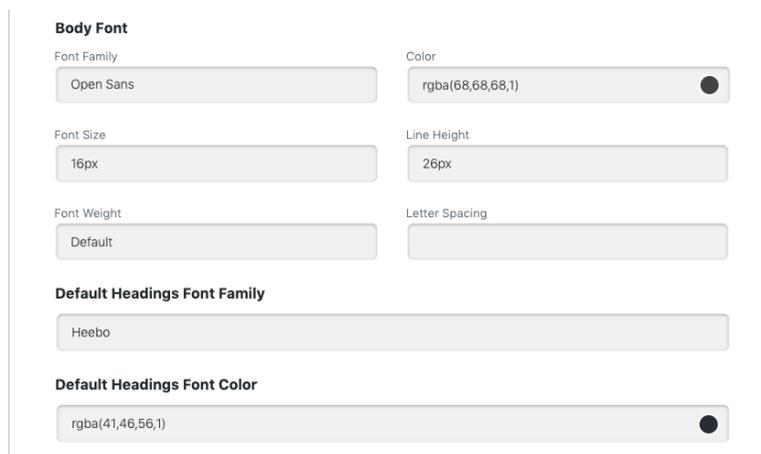

Setting the General Color Scheme for your Website

With the eLab Theme you can specify a basic color scheme for your website. You can create your own custom color scheme by defining a primary color, a secondary color, a third color and a site background color.

To specify the Color Scheme click on **Dashboard > Them Options > Style** in the WordPress menu.

Furthermore, the Style section contains typography settings such as body and headings font family, color, font size, etc.

Setting Up the Footer

You can customize the look-and-feel of the footer by changing a background color, a text color and links color. You can also control the width of footer columns as well as copyright text.

To set up or customize the footer of your web pages:

Click on **Theme Options > Footer** in the WordPress menu.

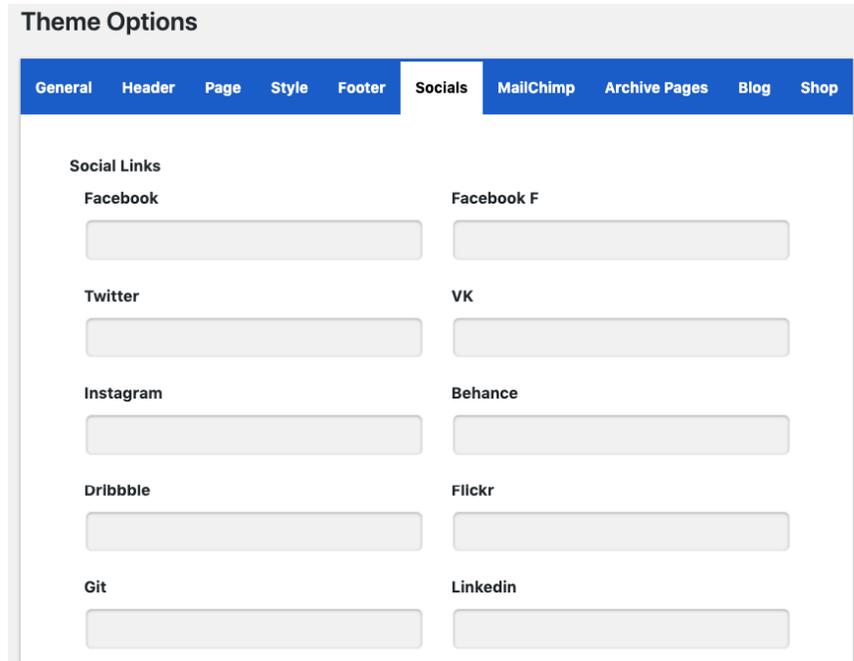

The screenshot shows the 'Theme Options' panel with the 'Footer' tab selected. The settings are organized into several sections:

- Footer Background Color:** A color picker set to `rgba(255,255,255,1)`.
- Footer Text Color:** A color picker set to `rgba(102,102,102,1)`.
- Footer Links Color:** A color picker set to `rgba(102,102,102,1)`.
- Footer Links Action Color:** A color picker set to `rgba(32,44,211,1)`.
- Enable Pre Footer Mailchimp block:** A toggle switch that is turned on.
- Pre Footer Position:** A dropdown menu set to 'Before Footer'.
- Pre Footer Mailchimp Icon:** A button labeled 'Set Icon'.
- Pre Footer Mailchimp Title:** A text input field containing 'Skype'.
- Pre Footer Mail:** A text input field containing 'E-lab_shop_con'.
- Footer 1 Width:** A slider set to 50%.
- Footer 2 Width:** A slider set to 16.6%.
- Footer 3 Width:** A slider set to 16.6%.
- Footer 4 Width:** A slider set to 16.6%.
- Footer 1 Width Tablet:** A slider set to 50%.
- Footer 2 Width Tablet:** A slider set to 50%.
- Footer 3 Width Tablet:** A slider set to 50%.
- Footer 4 Width Tablet:** A slider set to 50%.
- Copyright:** A text input field containing 'Easy returns. Free shipping on orders over \$100. Need help?'.
- Copyright image:** A blue button labeled 'Add Image'.

Note: If you want to have multiple footers, you can specify what information should be shown in the different footers by going to **Appearance > Widgets** and dragging widgets into the different Footer areas.

Social Networks

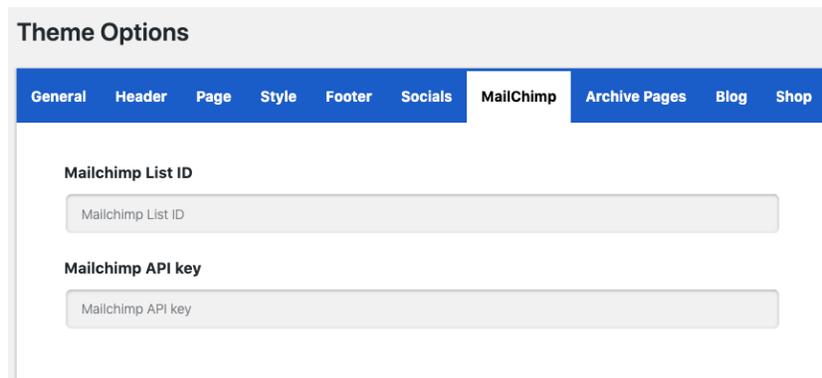

You can set links to your social network profiles in the **Theme Options > Socials** section

The screenshot shows the 'Theme Options' panel with the 'Socials' tab selected. The 'Social Links' section contains ten input fields for social media profiles, arranged in two columns. The left column includes fields for Facebook, Twitter, Instagram, Dribbble, and Git. The right column includes fields for Facebook F, VK, Behance, Flickr, and LinkedIn.

MailChimp Settings

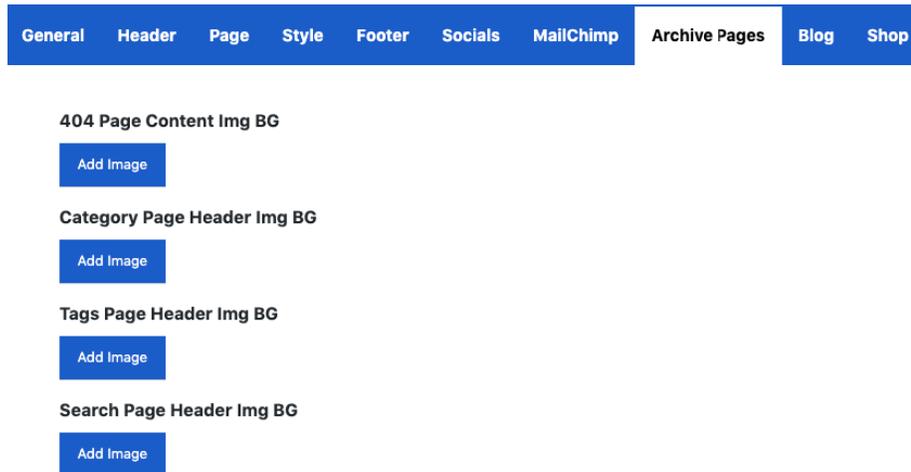

In order to use a subscribe forms in the theme, you need to set up Mailchimp list ID and API key in the Theme **Options > MailChimp** section.

The screenshot shows the 'Theme Options' panel with the 'MailChimp' tab selected. The 'Mailchimp List ID' section has a text input field with the placeholder 'Mailchimp List ID'. The 'Mailchimp API key' section has a text input field with the placeholder 'Mailchimp API key'.

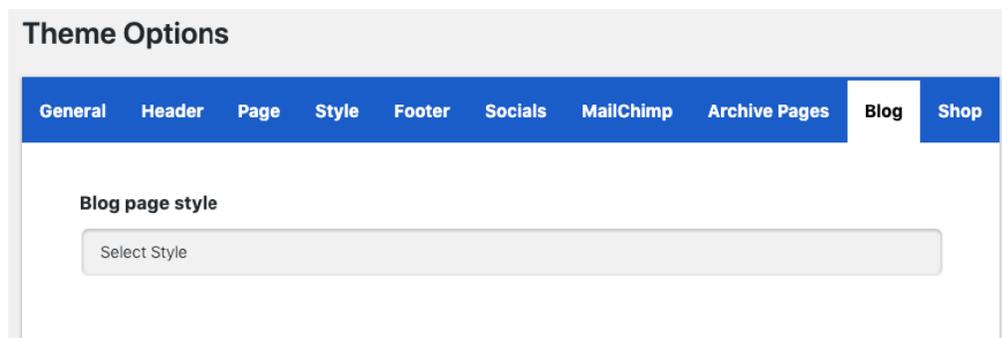

Setting Up the Archive Pages

You can add background images to archive pages of WordPress such as 404 page, category page, tags page and search page. To set up the background images click on **Theme Options -> Archive Pages** pages.

Blog Page Settings

You can set up the global style for your blog page in this section. There are 3 styles are available for a blog page.

---	--	--	--

Shop Page Settings

For setting up the global options of your shop page, you need to go to **Theme Options > Shop**. You can set up shop banner style, product hover style, products view styles, shop page and single product styles as well as a number of products per page.

The screenshot shows the 'Shop' settings panel in the Theme Options menu. The menu items are: General, Header, Page, Style, Footer, Socials, MailChimp, Archive Pages, Blog, and Shop. The 'Shop' tab is active. The settings are as follows:

- Shop Banner:** Select
- Product Hover Style:** Small box with icon buttons
- Products View in Shop Page:** Grid style 1
- Shop Page Style:** Default
- Single Product Style:** Image Left
- Products Per Page:** 16

Localizing or Changing the Language of the Theme

If you are using the eLab Theme in a non-English speaking country, you can change the language of the theme so that the wp-admin area will be in the language of your choice. You can change your site's main language via **Settings > General > Site Language**. This will change all your WordPress related prompts to the selected language, but you will still have to localize the theme related options and screens.

It's easy to localize your site using the [Loco Translate](#) plugin. (You can see a related tutorial in the following page: <https://localise.biz/help/wordpress/translate-plugin/beginners>.)

Another way is to add your translations using the [PoEdit](#) platform. Basically, you need to create a .po file that contains the translations and PoEdit will generate a .mo file for you. You then need to upload the .mo file to your theme's language folder (../wp-content/themes/theme-folder/languages/).

Note: Before adding translations for static strings, you need to rename the language files correctly according your site's language. The theme language files are located in the `../wp-content/themes/theme-folder/languages/` folder. You can find a list of language codes at [WordPress in your Language](#). As an example, the language code for English is en_EN, so you would save the translated files as en_EN.po and en_EN.mo.

Content management

Types of Posts

The eLab Theme comes with three built-in types of posts that are useful for multiple websites. The following table lists the various types of posts available:

Type	Used for...
Testimonials	Displaying testimonials from satisfied customers or clients.
Portfolio	Displaying portfolio of your cases.
Banners	Displaying advertisement banners for the shop.

Adding Testimonials

Testimonials are important for strengthening the credibility of your organization. You can easily add Testimonials using a custom post type of Testimonials.

To add Testimonial posts:

1. Click on **Testimonials > Add New** in WordPress dashboard menu.

The screenshot shows the 'Edit Testimonial' form in the WordPress dashboard. The form includes the following fields and callouts:

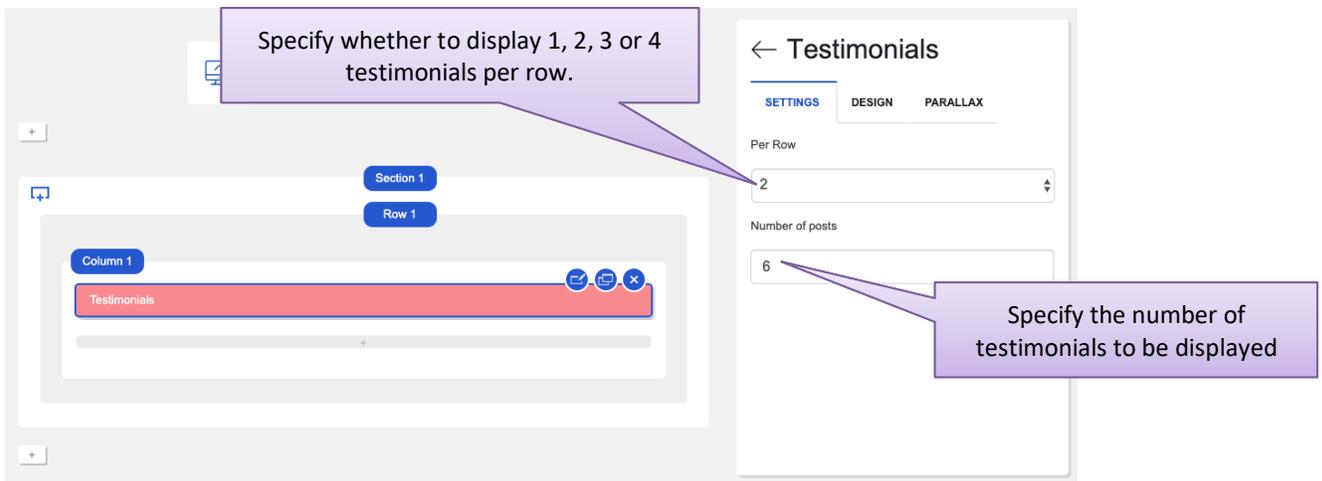

- Title:** A text input field containing 'Slim, Fast and Powerful'. A callout box points to this field with the text: 'Type the title of testimonial.'
- Testimonial Settings:** A section header for the settings area.
- Testimonial Author:** A text input field containing 'Andre Bailey'. A callout box points to this field with the text: 'Type the name of the author giving the testimonial'.
- Excerpt:** A text area containing placeholder text: 'Nam non erat sit amet ipsum eismod faucibus. Pellentesque lobortis dolor nibh, non vulputate nulla interdum in. Nam tincidunt bibendum imperdiet. Sed eget elit cursus, pharetra turpis ut, placerat'. A callout box points to this area with the text: 'Type the testimonial here.'

Displaying Testimonials on Other Pages or Posts

Once you have created the Testimonial posts, you can display them all over the site by just inserting a X Builder Testimonials element.

To display the testimonials on the website:

1. Add the **X Builder Testimonials** element on any page or post where you want to display the testimonials.

Adding Portfolios

If you have photos or videos connected with your projects, events, or services, you can display them in a portfolio on your website. You can add one or more portfolios of images and videos to your website. Portfolio is created as another custom post type called Testimonials. It has Categories that can be ordered as needed. Here you create just single post.

You can add an Image, Title and Category(es) for each Portfolio post.

Setting up Portfolio Categories

If you plan on uploading many portfolios to your website, it is a good idea to first create portfolio categories. This will help you segregate the portfolios based on their category, and display portfolios of just a particular category, if required.

To set up portfolio categories:

1. Click on **Portfolio > Portfolio Category** in the WordPress dashboard menu.
2. Create categories just as you would create normal categories in Wordpress.

The screenshot displays the WordPress dashboard interface for managing portfolio categories. On the left, the 'Add New Portfolio category' form is visible, featuring input fields for 'Name', 'Slug', and 'Description', along with a dropdown for 'Parent Portfolio category'. On the right, a table lists existing categories with columns for 'Name', 'Description', 'Slug', and 'Count'. The table includes categories like 'Clothes', 'Design', 'Fashion', 'Illustration', 'Photography', and 'Video', each with a corresponding count of items.

Name	Description	Slug	Count
<input type="checkbox"/> Clothes	—	clothes	8
<input type="checkbox"/> Design	—	design	0
<input type="checkbox"/> Fashion	—	fashion	8
<input type="checkbox"/> Illustration	—	illustration	4
<input type="checkbox"/> Photography	—	photography	4
<input type="checkbox"/> Video	—	video	8

Creating Portfolio Pages

To add Portfolio posts:

1. Click on **Portfolio > Add New** in the WordPress dashboard menu.

The screenshot shows the 'Edit Portfolio' interface in WordPress. It includes a title field with the text 'Smart watch to complete tasks quickly and efficiently', a rich text editor with a toolbar and placeholder text, a 'Portfolio Settings' section with 'ADD MEDIA' and 'BULK UPLOAD' buttons, and a right-hand sidebar with 'Publish', 'Portfolio category', and 'Featured Image' sections. Four callout boxes provide instructions: 'Type the title of the portfolio.' points to the title field; 'Assign categories to the portfolio.' points to the 'Portfolio category' section; 'Add gallery to the portfolio post.' points to the 'ADD MEDIA' button; and 'Add an image as a Featured Image.' points to the 'Featured Image' section.

Type the title of the portfolio.

Assign categories to the portfolio.

Add gallery to the portfolio post.

Add an image as a Featured Image.

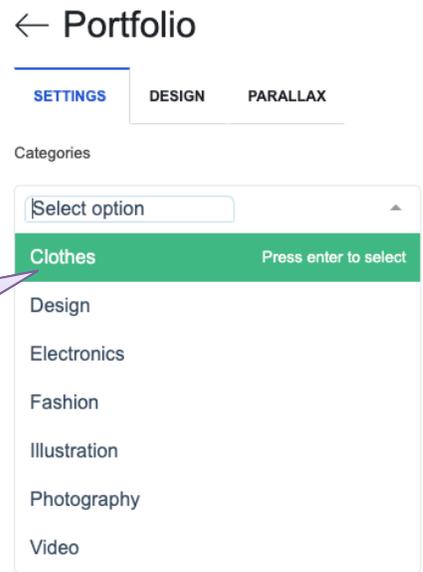

Displaying the Portfolios

Once you have created the Portfolio posts, you can display them anywhere on the site by just inserting X Builder Portfolio element.

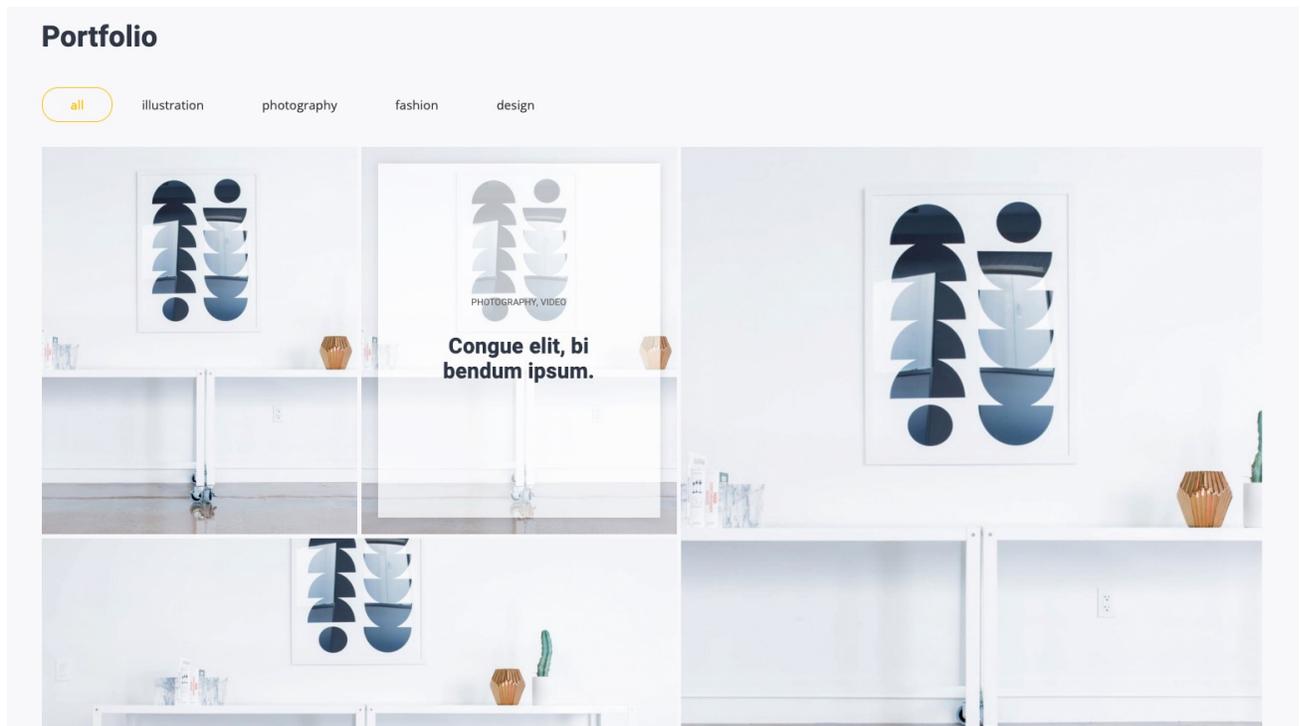

To display the portfolios on the website:

1. Add the **X Builder Portfolio** element on any page or post where you want to display the portfolios.

Select categories for displaying on the page or post

Outcome:

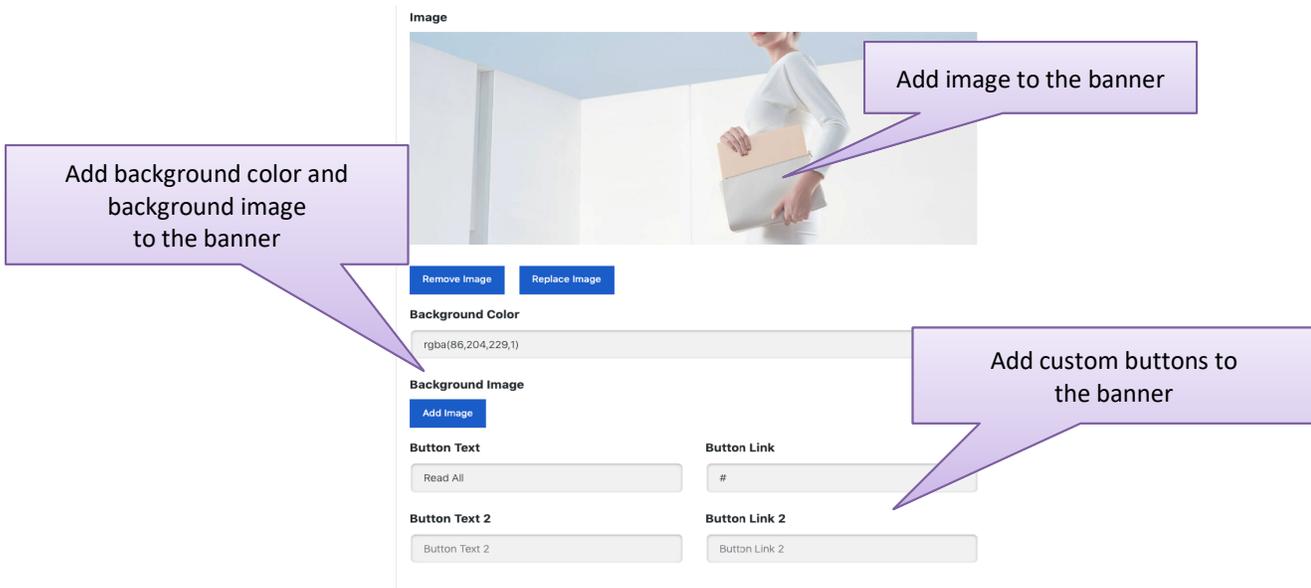

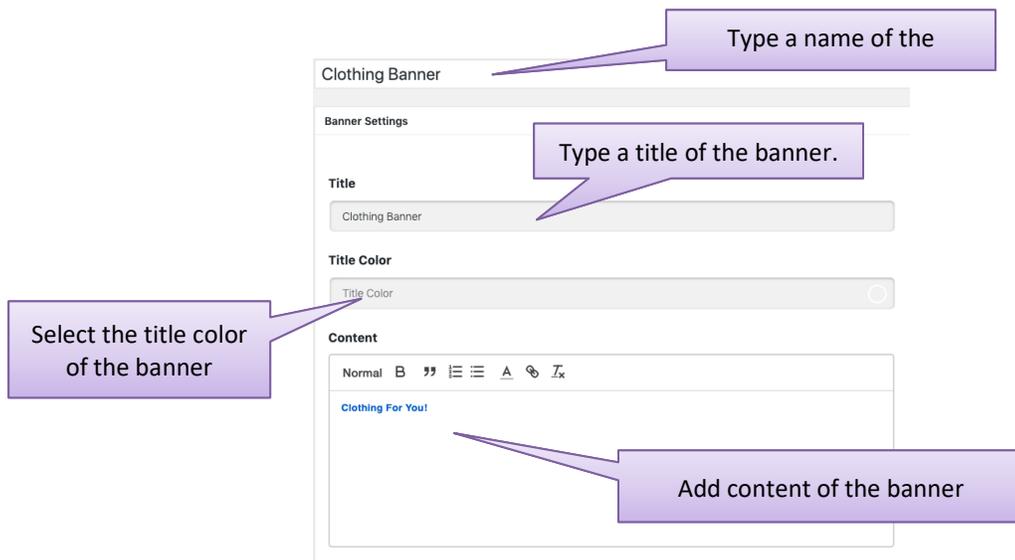

Adding Shop Banners

You can use the custom Banners post type to display promos, discounts and special offers in your online store. The banners can be displayed on the main shop page as well as in the categories menu.

To add Banners posts:

1. Click on **Banners > Add New** in the WordPress dashboard menu.

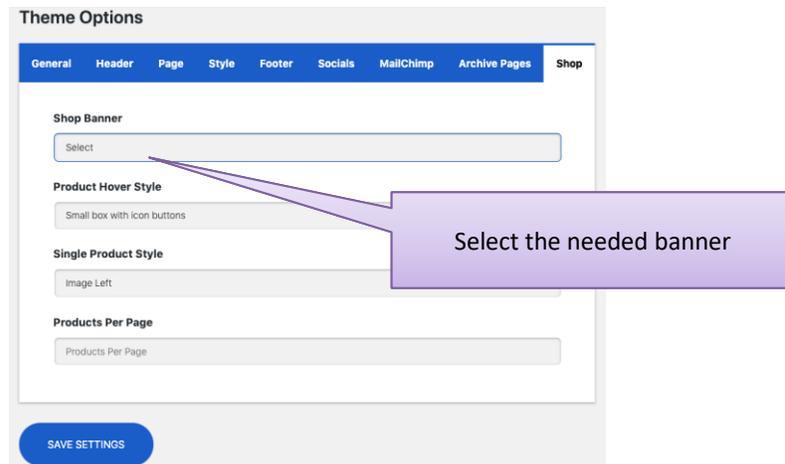

Displaying Banners on Shop and Category Pages

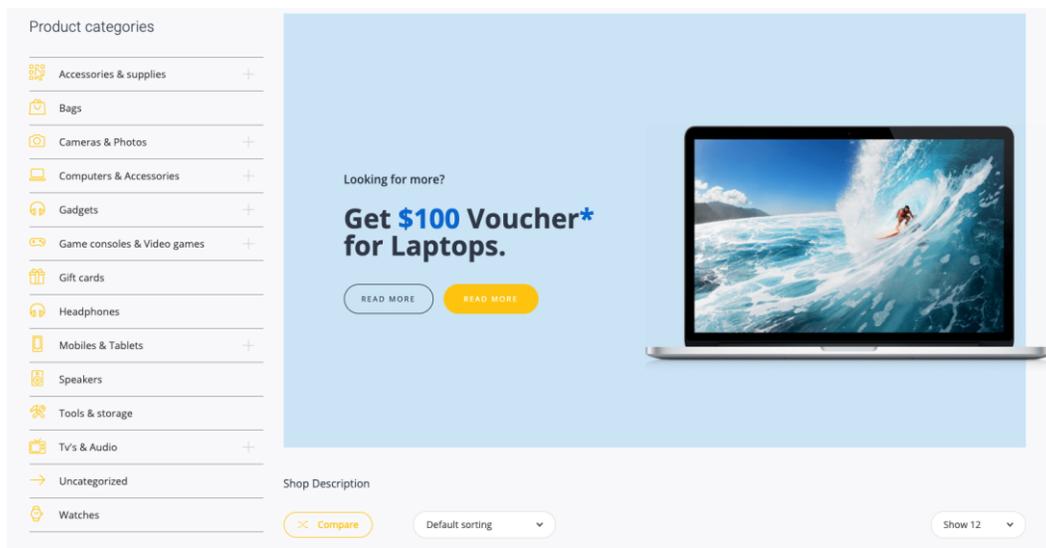

You can display the created banners on the main shop page and certain product category pages.

To display a banner in shop page:

1. Click on Theme **Options** -> **Shop** in WordPress dashboard menu.

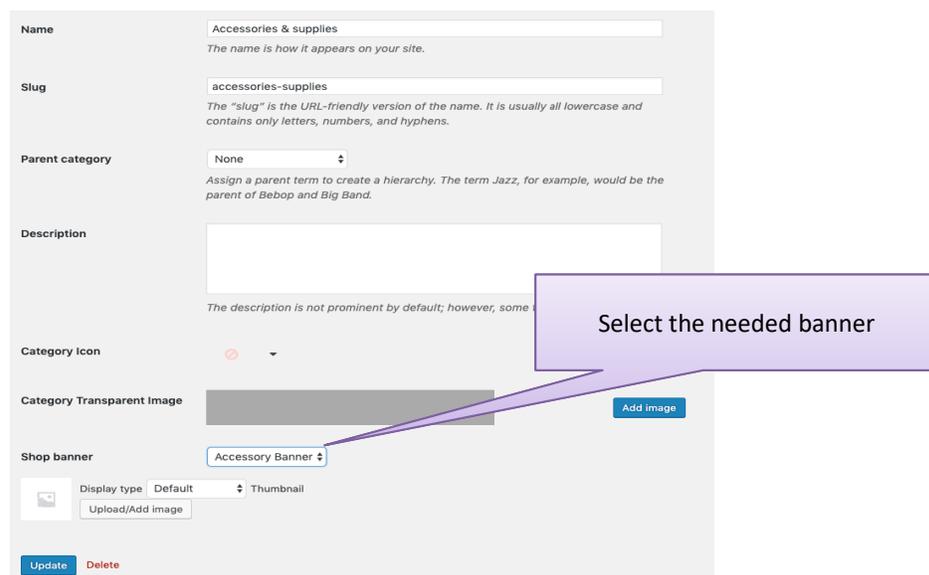

Outcome:

To display banners in the product category:

1. Click on the **Products -> Categories** section of WordPress dashboard menu.
2. Click on the category title from the list.
3. Select the banner from the Shop banner list.

Single Product Settings

Single products contain additional features that include possibilities for displaying product page in more complex layout. Options that Product Settings include:

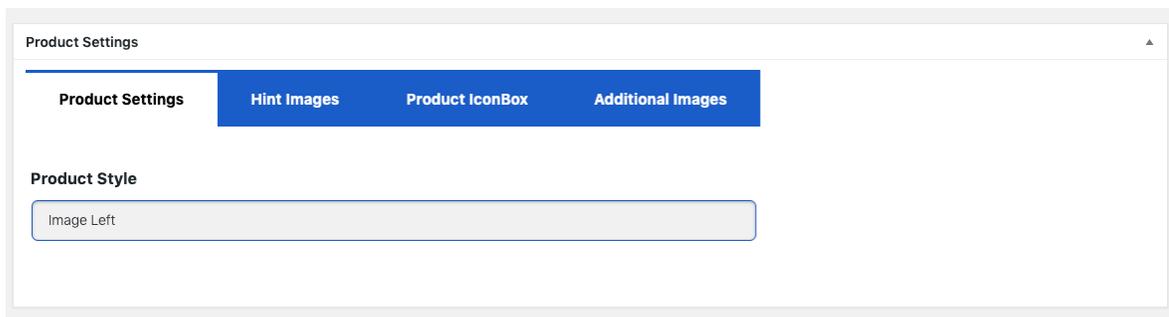

- **Product Settings** – select product style from the list of predefined styles;
- **Hint Images** – add images with recommended dimensions to display section with images and hint text;

- **Product IconBox** – add section with icon and title;
- **Additional Images** – add special image for displaying it in Product Carousel Grid element.

Product Settings

The section contains product style selection feature. There are 4 style options in the product style list – Global Settings, Image Left, Image Right, Image Center.

When you select Global Settings, product uses a style which applied in the **Dashboard -> Theme Options -> Shop** section.

Hint Images

Add images with the required dimensions to display special section with masonry grid images with hint text.

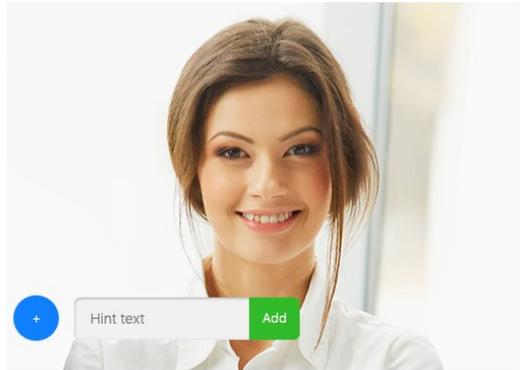

To add hint text, click on an uploaded image

Adding Other Content

Other than the special types of content covered in the previous sections of this manual, you can also add regular content to your website as normal pages and posts. You can create your pages using Classic mode or the X Builder plugin editor.

Additional Options for Pages and Posts

The following additional options are available while adding pages and posts:

1. You can add sliders to the page (if you have set up sliders using the Revolution Slider plugin).
2. You can change the page background color and make title box transparent (for a particular page) using the **Page Settings** panel.

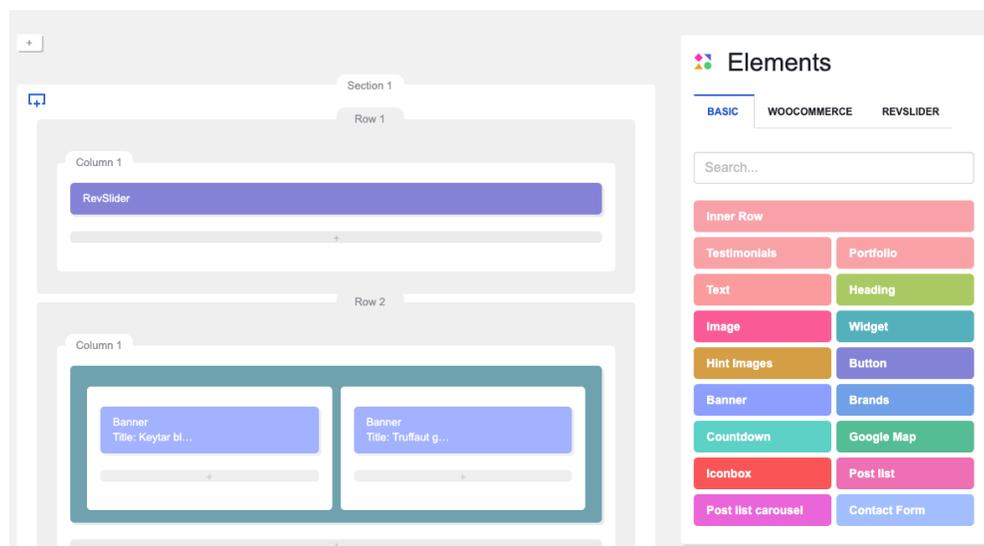

Using X Builder Plugin to Set Up the Pages

Your eLab Theme incorporates the X Builder plugin that helps you build pages quickly and easily with an intuitive drag-and-drop interface.

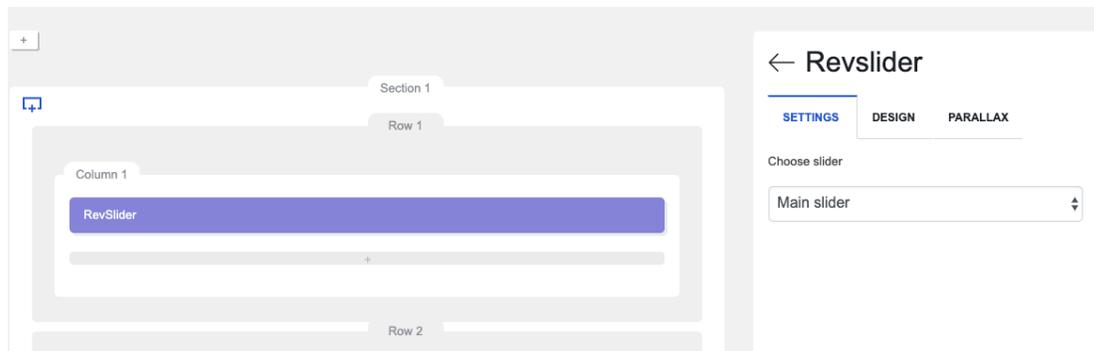

Note. This appendix gives you a brief overview of using the X Builder to your pages/posts. For a detailed instructions, see the [X Builder](#) guide.

Working with X Builder

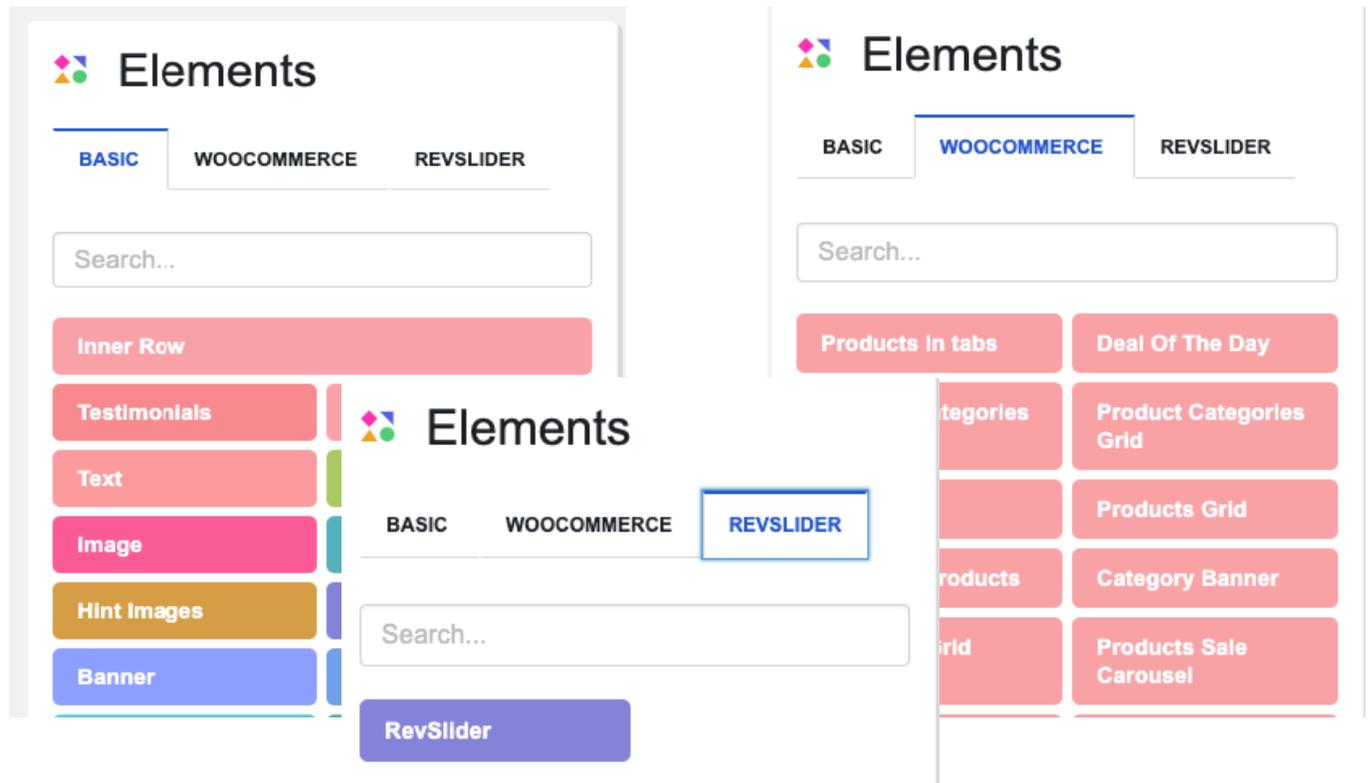

To add an element to the page, click on the needed element from the list of elements on the left and drag it to required place.

To make changes to any added element, hover the mouse pointer over the element. You will see icons that allow to move, edit or delete the item.

There are some tabs in the Elements section of the X Builder. These tabs contain elements of a particular category.

Miscellaneous Features

The eLab Theme also supports blogs. You can set up a custom blog page. Besides this, the eLab Theme is compatible with the WooCommerce plugin.

Adding a Blog to your Website

You can also have a regular blog on your website where you (or anyone with admin/author rights) can put up posts.

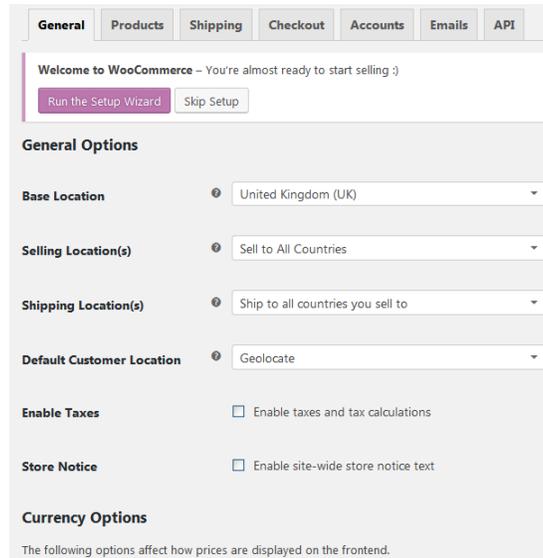

Note: Blog posts can be published from the WordPress admin area. Only someone with admin or author rights can put up blog posts.

You can assign any page you create as the start page of your blog by clicking on **Settings > Reading > Static Front Page** and selecting the page in the **Posts page** drop-down list.

Incorporating a WooCommerce Shop in your Website

WooCommerce is the most popular e-commerce plugin for WordPress. Now you can have a shop with all e-commerce features on your WordPress site.

Before you start adding products, please go through the WooCommerce plugin settings and specify everything you need for your shop.

The screenshot shows the WooCommerce 'General' settings page. At the top, there are tabs for 'General', 'Products', 'Shipping', 'Checkout', 'Accounts', 'Emails', and 'API'. Below the tabs, a message reads 'Welcome to WooCommerce - You're almost ready to start selling :)' with two buttons: 'Run the Setup Wizard' and 'Skip Setup'. The 'General Options' section includes: 'Base Location' (United Kingdom (UK)), 'Selling Location(s)' (Sell to All Countries), 'Shipping Location(s)' (Ship to all countries you sell to), and 'Default Customer Location' (Geolocate). There are also checkboxes for 'Enable Taxes' and 'Store Notice'. The 'Currency Options' section is partially visible at the bottom.

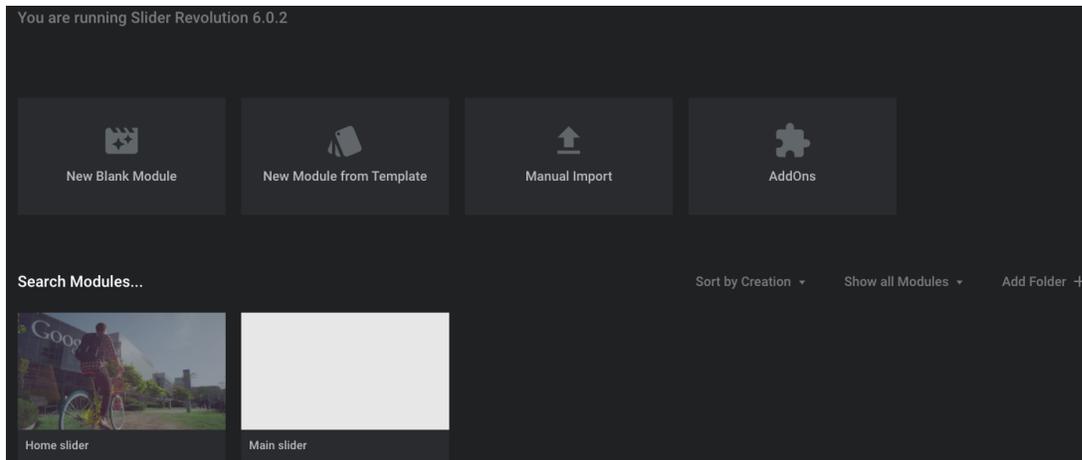

Please see <https://docs.woothemes.com/documentation/plugins/woocommerce/getting-started/> for more details on setting up a shop using the WooCommerce plugin.

Appendix B: Using the Revolution Slider

Your eLab Theme incorporates the Revolution Slider plugin that allows you to display a series of images or other content on your web pages as a slider or carousel. This is useful for picture galleries, introductions, etc.

Note: This appendix gives you a brief overview of using the Revolution Slider. Please see <http://www.themepunch.com/revslider-doc/slider-revolution-documentation/> for more detailed instructions.

Before you can add a slider to a page/post, you first have to create the slider. Click on **Slider Revolution** in the WordPress menu to access the Sliders page.

You can create a new slider from scratch or you can use a free or paid template.

Once the slider has been created, you can add it to your pages/posts in one of the following ways:

- In the page/post editor, add a shortcode `[rev_slider alias="xxx"]` (where "xxx" is the name of the slider), or using the Classic Editor, click on the  button and select a slider to insert it at your cursor location.
- In the Widgets screen (**Appearance > Widgets**), drag the "Revolution Slider" widget to a sidebar.
- Using X Builder, add a **Revolution Slider** widget/element to the page/post
